

### **A Message from the ISBC President**

I would like to welcome you to the International Symposium on Bioluminescence and Chemiluminescence that will be held in Guelph, Canada in 2012. This is the 17th in this long-running series of symposia that have been held previously at venues in Europe, Asia, and North America.

As in previous years, our goal is to provide a platform for presentations on all aspects of bioluminescence and chemiluminescence, both the fundamental and applied aspects. Bioluminescence and chemiluminescence continue to be the basis of important technologies that have had a major impact in both basic and applied research and in routine clinical diagnostics. An integral part of the symposium will be an exhibit of commercial products and we invite companies with reagents and instruments for bioluminescent and chemiluminescent test procedures to exhibit their products at the symposium.

This is the first time since 1993 the ISBC Symposium to be held in Canada and I am very much looking forward to meeting you at the symposium in Guelph in May 2012.

Larry J Kricka  
President of the ISBC
